Professional Summary

Data Analytics and ETL Developer with **4+ years** of experience designing enterprise-scale **Alteryx ETL workflows**, Batch Macros, Analytic Apps, and **Power BI** dashboards for financial reporting and business analytics. Delivered **16+ automated ETL workflows** and **12+ interactive dashboards**, reducing **manual effort** in multiple ways. Strong expertise in SQL, DAX, Power Query, data modeling, reconciliation, workflow automation, financial reporting and performance optimization.

Technical Skills

- Alteryx Designer
- Alteryx Server/Gallery
- Macros
- ETL Development
- Workflow Automation
- SQL
- Power BI
- DAX
- Power Query
- Semantic Models
- Data Modeling
- KPI Dashboards
- Reporting Tools
- Data Validation
- Data Integration
- Data Cleansing
- Financial Reporting
- Reconciliation
- SharePoint
- REST APIs

Professional Experience

Genpact — Sr. Consultant
Feb 2026 — Present

Bengaluru, Karnataka

- Architected enterprise-scale Alteryx ETL solutions supporting financial reporting, reconciliation, and validation.
- Led the design of reusable Batch Macros and metadata-driven ETL frameworks for scalable automation.
- Built centralized validation frameworks for automated quality checks, exception reporting, and reconciliation.
- Standardized reusable ETL components, improving maintainability and reducing development effort.
- Developed executive Power BI dashboards, semantic models, advanced DAX measures, and Power Query transformations.
- Optimized workflow architecture and ETL performance for production deployments.
- Managed Power BI Service datasets, gateways, scheduled refreshes, and Row-Level Security (RLS).
- Collaborated with finance and business stakeholders to deliver enterprise reporting solutions.

Tibil Solutions — Alteryx Developer
May 2022 — Feb 2026

Bengaluru, Karnataka

- Developed Alteryx workflows, Batch Macros, and Analytic Apps for financial reporting.
- Performed data extraction, cleansing, transformation, and validation using SQL and Excel.
- Built Power BI dashboards for KPI tracking and operational reporting.
- Created DAX measures, calculated columns, and Power Query transformations.
- Assisted in ETL optimization and workflow performance tuning.
- Published reports to Power BI Service and monitored scheduled refreshes.
- Implemented validation rules and audit checks to improve reporting accuracy.
- Supported production deployments, workflow maintenance, and issue resolution.
- Collaborated with business users to gather reporting requirements.

Education

B.Tech in Electronics and Communication Engineering

Aug 2018 — May 2022

Vellore Institute of Technology, India

Projects

Financial Reporting & Validation Automation

Mar 2026 – Present

OTIS

- Architected an enterprise-grade Alteryx ETL framework for Job Costing, Margin Reporting, and reconciliation automation.
- Developed reusable Batch Macros and metadata-driven workflows for dynamic report processing.
- Built automated validation and exception reporting frameworks.
- Designed scalable ETL pipelines using multiple Reporting tools such that manual effort is nullified.
- Implemented modular workflow architecture improving scalability and maintainability.
- Collaborated with Finance stakeholders to automate reporting processes.

Legacy Banking System Integration

Aug 2022 — Oct 2023

US Bancorp

- Developed 12+ Power BI dashboards supporting finance transformation.
- Created advanced DAX measures for KPI and profitability analysis.
- Automated billing and reconciliation workflows using Alteryx, reducing manual effort by 40%.
- Improved ETL accuracy and reporting consistency.
- Delivered scalable automation aligned with business requirements.

Certifications

- **Alteryx:** [Alteryx Designer Core](#)
- **Power BI:** [Analyzing Data with Power BI](#), [Power BI for Beginners](#)
- **SQL:** [SQL \(Basic\)](#), [SQL \(Intermediate\)](#)
